About Flickr

Flickr is a photo sharing website in which members can log in and upload their own photos to share, as well comment on other users' photos, join groups and participate in discussions. It is free to join at the basic level.

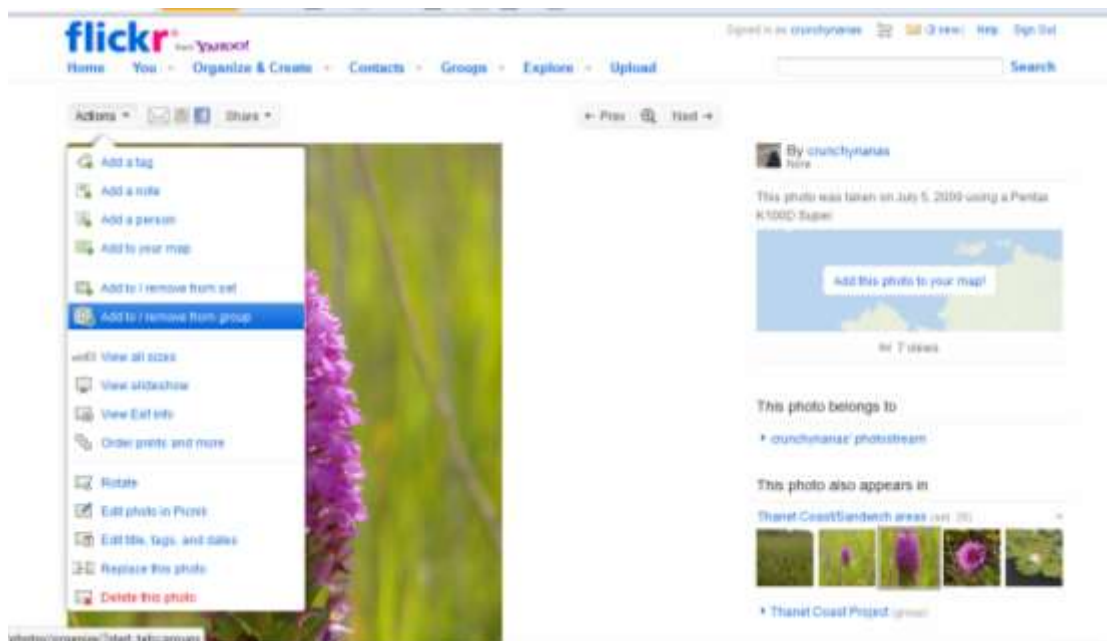

Thanet Coast Project Group

Once you are a member, you can join the Thanet Coast Project group at: www.flickr.com/groups/thanetcoast/ and submit your images of the Thanet coast to the group by clicking the actions button above your image and then selecting 'add to group' (see 1 below). Then, choose the group you want to add it to from the list of groups in the window that appears (see 2 below). If you then click back to the Thanet Coast Project group page, you will see your image is now showing in the Group Pool (see 3 below). If you decide later that you don't want that image in the pool after all, you simply go back to the actions button and select "add to /remove from group."

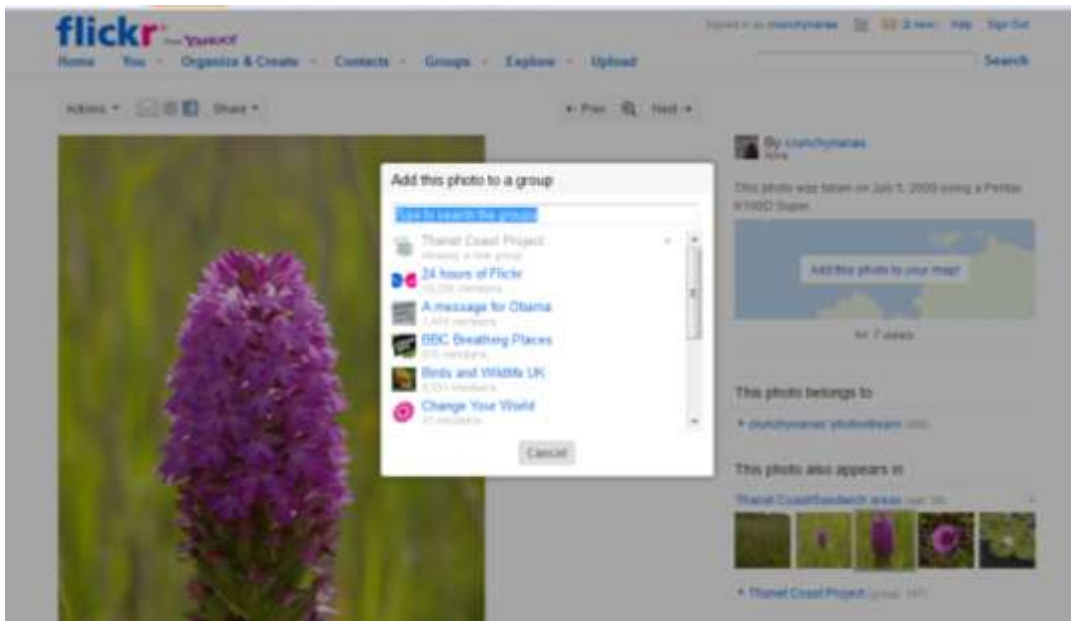

You can also check to see what the Thanet Coast Project team uploads on our photostream at: www.flickr.com/photos/thanetcoast/

Thank you for uploading your images to the group pool. We are hoping that it will build a gallery of shots around the Thanet coast and will hopefully promote more discussion and camaraderie as well!

1. Add to group:

2. Choose which group you want to add the photo to (eg Thanet Coast Project):

3. You can now click onto the Thanet Coast Project group page and see your image showing in the group pool:
